

Track 2 Magnetic Stripe Encoder

Cardlock Vending uses the Neuron model CT 894 magnetic card encoder. It has been absolutely superb. This encoder is motorized, and driven by your "PC". It has been replaced by Neuron's newer model CTG motorized encoder

Neuron does not allow CVI a discount, so we request our customers purchase direct from Neuron.

Neuron's contact information is: Mario Lopez, Accounts Executive, Neuron Electronics, Inc., 8541 Wellsford Place - Suite E, Santa Fe Springs, CA 90670

Phone (562) 789-1322 Fax (562) 789-1399
