

## Cardlock Vending's CRE-FL Card Reader Enclosure

The model CRE-FL enclosure is **full length** (to the ground) to provide more shelter in the windy-rainy climates. There is a large Plexiglas window on both sides and the rear, to provide comfortable viewing and security.

The tubular steel construction with heavy sheet steel panels makes for a sturdy enclosure. The steel is powder coated for a durable and attractive paint finish. White is standard, and custom colors and graphics will be quoted. A ceiling light is included – providing security, visibility and a lighted area for literature and marketing pieces.
